

DISCOVERY TOOL

# THE 7-DAY PAIN & ACTIVITY LOG

Pinpointing Triggers and Mapping Latent Inflammatory Responses

CHASE THE DATA, NOT THE SENSATION.

The Foot Recovery Toolkit | Dr. Jonathan Schutza, PT, DPT

# How to Use This Log

Log every episode of walking, standing, exercise, or notable pain flare

## Pain Scale Reference

**0-1:** No pain | **2-3:** Mild discomfort | **4-5:** Moderate, affects activities | **6-7:** Significant, limits activities | **8-10:** Severe, cannot perform normal activities

Day 1 — Date: \_\_\_\_\_

### Entry 1

| TIME                          | ACTIVITY                 | DURATION |
|-------------------------------|--------------------------|----------|
| _____                         | _____                    | _____    |
| SURFACE                       | FOOTWEAR                 |          |
| _____                         | _____                    |          |
| PAIN IMMEDIATELY AFTER (0-10) | PAIN 30-MIN LATER (0-10) |          |
| _____                         | _____                    |          |
| NOTES                         |                          |          |
| _____                         |                          |          |

### Entry 2

| TIME             | ACTIVITY          | DURATION |
|------------------|-------------------|----------|
| _____            | _____             | _____    |
| PAIN IMMEDIATELY | PAIN 30-MIN LATER |          |
| _____            | _____             |          |

### Daily Summary

|                                    |                  |
|------------------------------------|------------------|
| MORNING BASELINE PAIN              | WORST PAIN TODAY |
| _____                              | _____            |
| TOP ACTIVITIES THAT INCREASED PAIN |                  |
| _____                              |                  |
