

12 Week Kinetic Recovery Progress Log

Step 1: Set the Week Number

At the very top of the page, fill in the **WEEK #** [___] blank. This number should match where you are in your 12-Week Progressive Load Schedule.

Step 2: The Daily Check-In (Days 1–7)

Make it a habit to fill out these sections twice a day: once when you wake up, and once about 30 minutes after your exercise. Be honest with your scores; we are looking for patterns, not perfection.

- **Date** [_____]: Enter the current date.
- **Morning Baseline (MB)** [___ / 10]: The moment your feet touch the floor for your first steps. Rate your pain on a 0-10 scale (0 is no pain, 10 is unbearable). Circle the number.
- **Active Minutes** [___ min]: How long did you walk or perform structured, intentional exercise (e.g., your Phase 2 exercises or Phase 3 strength work)?
- **Surface / Footwear** [_____]: Write down *exactly* what was on your feet and *where* you walked. For example: "New Balance sneakers / Cement sidewalk," "Orthotics / Wood office floor," "Barefoot / Carpet."
- **Latent Pain (30m Post)** [___ / 10]: This is crucial. Wait 30 minutes *after* you finish your active minutes. Rate your pain when your tissue has cooled down.
- **Aha! Note / Triggers** [_____]: Write down any specific sensations or unusual factors. E.g., "Sharp pain felt on outer heel," "Felt fine until hour 4 of work," "First day trying the softer inserts."

Step 3: The Weekly Decision Audit

At the end of the 7-day period, look back at all of your daily squares. This is your high-level audit to find patterns and make the safest decision for next week.

- **Total Active Minutes This Week:** Add up all your recorded minutes from Days 1 to 7.
- **My +10% Goal for Next Week:** Multiply your "Total Active Minutes" by **1.1**. This number is your safe upper limit of time for the *next* week.
- **Patterns Identified (Checklist):** Tick the boxes that apply to your past week. These are common "flare" factors.
- **The Traffic Light Decision:** Read the definitions carefully and circle the color that best describes your week. Your Morning Baseline (MB) and Latent Pain scores from Days 1-7 guide this choice.

The Golden Rule: If you are unsure, choose the more conservative option (e.g., pick Yellow over Green). Consistency beats intensity every single day.

WEEK #[___] PROGRESS LOG

12-WEEK KINETIC RECOVERY PROTOCOL • DATA-DRIVEN RECOVERY

Day 1 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear: _____

⚠️ Latent Pain (30m Post) [___/10] _____

Aha! Note/Triggers: _____

Day 2 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear: _____

⚠️ Latent Pain (30m Post) [___/10] _____

Day 3 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear: _____

⚠️ Latent Pain (30m Post) [___/10] _____

Day 4 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear: _____

⚠️ Aha! Note/Triggers: _____

Day 6 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear: _____

⚠️ Aha! Note/Triggers: _____

Day 7 | Date [_____]

🕒 MB [___/10] ⌚ Active Minutes [___ min] Surface/Footwear (30m Post) [___/10]

⚠️ Aha! Note/Triggers: _____

THE WEEKLY DECISION AUDIT

Total Active Minutes This Week: [___] **My +10% Goal for Next Week: [___] (Last week x 1.1)

Patterns Identified (Checklist):
☐ Stacked two High Cost days back-to-back,
☐ Zero latent pain flares ->30 min,
☐ Completed 100% Habit Stacks.

The Traffic Light Decision Matrix:
Listen to the Data.

- Green: Proceed +10%
- Yellow: Maintain Load
- Red: Roll Back 2 Weeks

Follow the One-Step Increase Rule. Consistency > Intensity.
